Tips for first-time buyers.

Hi, if this is your first TGE, we want to thank you for choosing us as your first-time cryptographic token purchase.

Participating in the TGE isn't hard, but there's some traps for first time users if you're not confident in purchasing tokens.

First off… read the instructions! They're listed next to the steps down the right-hand side of the page. Read them twice… just to be sure.

Get to know what you need to do in each step; understanding the flow will make it easier to follow the steps.

Have your email client open, you'll need it to see confirmation of your purchase.

You'll need to move between the TGE website and your Ethereum wallet so be prepared to jockey between the two.

Once you've gone through the process on the TGE site, you'll be given an Ethereum address to send your chosen number of ETH, BTC or LTC to in order to complete the purchase.

You decide how much you want to spend on POWR tokens but it's capped at a limit of $25,000 USD. If you send more, than $25,000 USD any additional amount will be allocated to the main public TGE event, expected to start shortly after the pre-sale closes.

You won't be asked your purchase amount on the TGE website. You'll be given an Ethereum, Bitcoin or Litecoin wallet address and then you'll have to send your chosen amount of ETH, BTC or LTC to that address. This works best for you because you'll buy POWR tokens at the prevailing exchange rate rather than us setting a rate for you.

Key point: CUT & PASTE IS YOUR FRIEND! In fact, it's your best friend.

When you're transferring the wallet addresses, use the Cut&Paste function to make sure you transcribe the addresses perfectly.

Once you've sent your ETC, BTC or LTC to the address provided, wait for the email confirmation.

And that's it…

It's a simple five-step process but get comfortable with it before you leap in.

Thanks for supporting Power Ledger.

Welcome to the first step in the democratisation of power!
